Next Green - Collision protection Pole 108-750 RAL 9005 protects your charging station from being impacted and run over by a vehicle. The impact protection is installed either directly on a concrete base or in a \varnothing 60 mm base together with Ground mount GP60-160 Combo (E-number 27 000 69). The Collision protection pole 108-750 has a pole diameter of 108 mm and a height of 750 mm. The base plate has a CC distance of 160 mm and an outer dimension of 200 mm. The impact protection can alert drivers to your charging station, preventing it from being damaged.
